

PXG 0311 XF GEN6 FAIRWAYS

PXG 0311 XF GEN6 Fairways feature our most-advanced technology and are engineered for golfers seeking maximum forgiveness. The large, squared face expands the hitting zone to provide off-center hit forgiveness leading to faster ball speeds with greater distance. The Railed Sole helps the club move effortlessly through the turf, giving you the ability to get it up in their air and down the fairway for incredible distance.

FEATURES

High-Strength AM355 Body
 Larger Squared Face
 Railed Sole Geometry
 High-Strength Carbon Fiber Crown
 Supported Weight Structure
 2-Weight Precision Weighting Technology
 Robotic Polishing
 Adjustable Hosel

BENEFITS

Mid-Spin Performance
 Fast Ball Speeds
 Great Distance
 High MOI
 Unbelievable Forgiveness
 High Trajectory
 Impeccable Sound and Feel

PXG 0311 XF GEN6 FAIRWAYS SPECIFICATIONS

CLUB	LOFT	LIE	LENGTH	HEAD MASS
3	16°	58°	43"	215g
4	17°	58°	43"	215g
5	19°	58.5°	42.5"	219g
7	22°	59°	42"	224g

PRECISION WEIGHTING TECHNOLOGY

PXG 0311 XF GEN6 Fairways present one light (2.5g) and one heavy (12.5g) sole weights that are interchangeable to support preferred spin and bias settings.

Weights are available in 2.5, 5, 7.5, 10, 12.5, 15, 17.5, and 20 gram options and can also be used to adjust the overall head mass.

(Dot scheme identifies the weight.)

WEIGHT IN BACK/TOE

- Fade Bias
- Pulls CG Toe Side
- Anti-Hook Performance
- Added Forgiveness

WEIGHT IN BACK/HEEL

- Draw Bias
- Pulls CG Heel Side
- Easier to Square the Face
- Added Forgiveness

SUPPORTED WEIGHT STRUCTURE

Through rigorous modal analysis testing, PXG designed an innovative supported weight structure that delivers unbelievable sound and feel. With Precision Weighting Technology positioned in the extreme perimeter of the clubhead and anchored to the outer wall, a sophisticated stiff and stable structure that generates high frequency vibrations is created. Using modal analysis to study the vibrations, PXG determined that this geometry produces an optimal feel and sound at impact.

HIGH-STRENGTH CARBON FIBER CROWN

The PXG 0311 XF GEN6 Fairway crown is made entirely from high-grade carbon fiber. This lightweight material saves mass in the crown, allowing it to be redistributed low and to the perimeter of the clubhead for optimal CG and added forgiveness.

ROBOTIC POLISHING

Robotic polishing is a high-precision process that ensures the face thickness and the face curvature (the bulge and roll radii) are manufactured to design specs that maximize performance and impart corrective spin for ideal ball flight on off-center shots.

HIGH-SPEED, SQUARE FACE

PXG 0311 GEN6 Fairways present a HT1770 stainless steel face engineered to position the CG low for high launch, optimal spin performance, and insanely fast ball speeds. The optimized squared face design shifts the perimeter skirt more vertical, increasing the surface area to significantly boost forgiveness of the clubhead.

HEAD DESIGN

Made from a high-strength AM355 steel, the 0311 XF GEN6 Fairway has a larger head profile shape, optimized to deliver maximum forgiveness. The clubhead body features a squared face design and Railed Sole geometry that extends down to help create a low friction interaction with the turf.
