

# FRONTLINE ELITE

Our all-new lineup of Frontline Elite Putter features aggressive styling, advanced, full-bodied shaping, adjustable weighting systems, plus Tungsten SOFT faces. And with an exciting variety of head design, alignment, shaft, and grip options, you can find the perfect Frontline Elite Putter made top to bottom for your individual putting stroke.

## KEY INNOVATIONS

### TUNGSTEN SOFT

A combination of our proprietary Speed Optimized Face Technology for consistent distance on all strikes, plus tungsten material for a forward CG and straighter, more accurate putts.

### STROKE SPECIFIC DESIGNS

All Frontline Elite Putter feature a grip, hosel, and alignment scheme designed specifically for either a slight arc or straight stroke type. Either simple or high-contrast lines are featured on each head, with our patented 2135 Technology featured on all mallets, for supreme performance that fits your stroke.

### CONSISTENT SWING FEEL

Each model features adjustable sole weights as well as different built-in, counterbalance weights. This harmonious weighting system gives every Putter an ideal, consistent swing feel, no matter the shaft length or head chosen.

### STEPLESS CHROME SHAFT

### UST ALL-IN SHAFT\*

\*Available as an upgraded stock option on all Men's models.
