

P·7CB

FEATURE	BENEFIT
BEST-IN-CLASS FEEL	Using Tour feedback and modal analysis we've strategically designed mass placement for best in class feel. Crafted using Compact Grain Forging and 2000 tons of pressure to deliver the purest feeling 1025 soft carbon steel possible.

PRECISE CONTROL	Precise milled face and grooves combined with a constant CG the P·7CB is designed to deliver an optimal launch and spin combination for the ultimate control and precision.
------------------------	---

CONSISTENCY	Created to maximize accuracy and consistency. The P·7CB optimized perimeter weighting and co-forged tungsten designed to deliver a beautiful blend of stability and workability.
--------------------	--

COMPACT TOUR SHAPING	Every aspect of shaping in this iron was intended to meet the needs of discerning ball strikers. A compact blade length and thin topline create a confident, clean look in the playing position while the sole camber and progressive bounce profile provide consistent turf interaction.
-----------------------------	---
